

Sovereign AI capability is a stack of control points

Assured access, value extraction and strategic leverage depend on system-level control, not just model ownership.

Human over-the-loop

Design-time control

Human-led, AI-assisted
aggregate / system level (across many cases)

Learning & redesign

Scalable runtime control

AI-driven, human-assisted

AI agent inner loop

Mostly autonomous (AI-driven)

Search

Plan

Act

Verify

Aggregated outcome & consequence review

across many cases (pattern-level)

Human-led, AI-assisted

continuous,
not infrequent
